
USB-HUB INSIDE

Internet keyboard with integrated USB hub

Use auxiliary USB devices with ease.

The two-way USB hub makes it simple to connect USB devices, e.g. WebCams, USB drives etc. directly to the keyboard.

The keyboard has 19 additional hotkeys for quicker access to the internet, multimedia, e-mail, programs and power management functions.

All extra keys are user-definable to enable you to tailor your keyboard precisely to your requirements.

The KeyM@n software provided makes it simple to assign functions to keys.

Trend Line

CyBo@rd USB-Hub G83-13500

Key benefits

- Integrated USB hub
- Easy connection of USB auxiliary devices
- Fast access to internet, multimedia, e-mail, program and power management functions
- Internet keyboard with 19 additional user-programmable keys (hotkeys)
- KeyM@n software
- Removable palm rest

Applications

- PC applications
- Internet
- Multimedia
- E-mail

USB auxiliary devices

It's easy to connect a variety of different USB auxiliary devices, e.g.:

KeyM@n Software

The specially developed KeyM@n software that is included allows all 19 hot keys to be freely programmed. The main focus is on ergonomic design for the user. For example, only few actions are required by the user to assign functions to the hot keys quickly and easily using Drag & Drop or "Send to" from the context menu. Should 19 hot keys not suffice, three further levels of hot keys are available by using the control keys "Ctrl", "Alt" and "Shift". Key assignments can be imported and exported using the "KeyPort" application. This allows to backup key assignments or to exchange them with other users. Users without CyBo@rd or CyBo@rd Plus can try out KeyM@n with any keyboard. Then the "Scroll"-key can be programmed like a hot key.

Technical specifications

Temperature range:
Storage temperature:
-20 °C to 60 °C
Operating temperature:
0 °C to 50 °C
Dimensions (incl. wrist rest):
(L x W x H) 458 x 246 x 40 mm
Weight (incl. wrist rest):
approx. 1,200 g
Power supply:
5 V/DC ±5% SELV
Interface:
PS/2 and USB

System requirements

- IBM or compatible PC
- USB interface
- CD-ROM drive
- Up-to-date browser for Internet keys
- Sound card/loudspeaker/multimedia software for multimedia keys
